### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 and 12-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Bodelin-LeComte (USP 5,928,652).

Bodelin-LeComte discloses compositions, which may contain pearlescent agents such as mica, coated with titanium oxide.[Note Column 4, lines 28-33] and may be used in the pharmaceutical field.[Note Column 1, lines 8-10]. As applicant has remarked in the amendment of 11-26-03, that the pigment consists essentially of mica coated with a layer of titanium dioxide and/or a layer of  $\text{Fe}_2\text{O}_3$  or  $\text{Fe}_3\text{O}_4$  or mixtures thereof and claims 12-15 provide a food or pharmaceutical produce containing a pearlescent pigment devoid of the aluminum hydroxide layer and the aluminum lake, applicant is reminded in claim 12 the term of “comprising” opens the language to any or all ingredients and applicant’s arguments of being devoid of the aluminum hydroxide layer and aluminum lake is not correct or persuasive with this open language. Boedelin-LeComte teaches pearlescent agents such as mica coated with titanium oxide the use of this composition is in the pharmaceutical field. So the composition reads of a mica substrate including a titanium dioxide layer thus anticipating applicant’s claims.
